

Your phone is more than just a phone

“Stop searching, you have it in your hand”

With increased functionality of the phone, you can do much more than just send SMS/MMS or have a talk.

- Use the phone to surf the WEB
- Share pictures with your friends (using the Spagat hardware dongle for the TV)

The mobile phone as remote control for your audio-video equipment: In the House of the Future the application will follow you wherever you go, you'll never miss a part of the soccer match.

Control the heating, lights, sensors and many more from your mobile, here shown from an Intelli Implementation.

Or play with your most favourite model train, direct from your phone. For a live demo visit us on <http://193.156.19.146/~X10/>.

We believe that innovation will come from the user bringing her devices (typical: phone, laptop) back into the home, and using these devices for innovative services in the home.
